

## FILTER CARTRIDGES

# **FilterVIN**

## PRODUCT INFORMATION

FilterPES cartridges are built with a polyethersulfone pleated membrane, have high mechanical, thermal and chemical resistance.

The asymmetrical structure of the membrane and the large filtering surface guarantee autonomy and long service life.

The polyethersulfone and polypropylene that make up the cartridge are chemically inert to proteins, colloids, aromas and color and do not alter the filtered fluid.

Filtration rate: from 0.45 to 1.2 micron for application of microbiological stabilization of wine and beer

# Typical Liquid Fow vs. Differential Pressure

Water at 20°C per 10" module
